MEMORANDUM FOR:

SUBJECT:

REFERENCE:

1. Thank you for your comments on GEM 529, 23 October 1957, "The Radio Broadcast Propaganda Struggle in the Middle East". Most of the differences between our estimates for the total power of radio transmitters in the various countries can be attributed to the date of the information and, as you implied, differences in estimating short wave transmitter power. The source used for obtaining most of the information on the power of transmitters was "Broadcasting Stations of the World" published by the Foreign Broadcasting Information Service. We have just recently received the latest edition of this source and their latest estimates are closer to those of ABC as follows:

	<u>Country</u>	<u>Present Power (kw)</u>	
		<u>FBIS</u>	<u>ABC</u>
	Egypt	425-1025	645
	Iran	130	140
	Iraq	156	496
25X1X4		178	184
	Jordan	30	30
	Lebanon	7	7
	Libya	36	12
	Saudi Arabia	45	115
	Sudan	50-80	56
	Syria	176-238	109

~~SECRET~~

2. With regard to the Egyptian estimates, the latest FBIS estimate is smaller than the one given in CSM 529. Differences between our estimates are probably in determining the transmitting power of the six transmitters of Abu Zabal which vary from 240-340 kilowatts.

3. Other more current information along with FBIS information was used for Iraq, Iran, Jordan, Libya, and Saudi Arabia. For these countries, our estimates are generally closer together.

25X6A

4. Planned increases in transmitting power are very close with the single exception of [REDACTED]. Here again, the planned estimate in CSM 529 for [REDACTED] has subsequently changed to 200 kilowatts because one of the planned transmitters is not in operation. This change brings our estimates much closer together.

25X6A

5. Your comments were greatly appreciated.
